Welcome to Web Dev Week

Mark Hoel

0	Teacher @ UCC since 99’
1	2 kids, 17 and 20 both in IT
2	Love sports, traveling, meeting people
3	Love data, GIS, Making web apps

This presentation

0	Introduction
1	Vocabulary
2	Review of the week,

Mark Hoel

Design Question …
What **font** is this?

0	Teacher @ UCC since 99’
1	2 kids, 17 and 20 both in IT
2	Love sports, traveling, meeting people
3	Love data, GIS, Making web apps

Roboto (/roʊbɔːtoʊ/) is a sans-**serif** typeface family developed by Google as the system font for its mobile operating system Android, and released in 2011.

https://fonts.google.com/specimen/Roboto

I am sans.

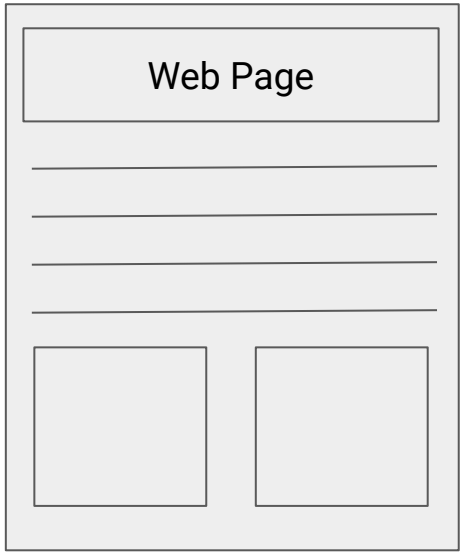
I am serif.

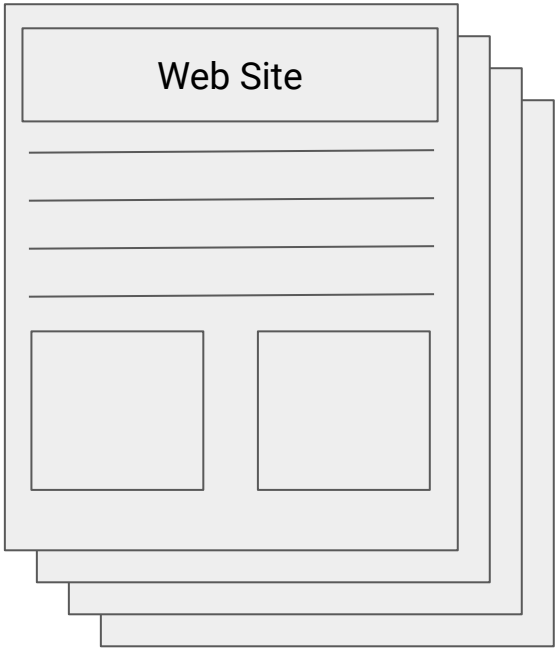
Introducing San Francisco

The system font for OS X, iOS, watchOS, and now tvOS.

SF

What is the difference between a web page and site?





What is a web browser? What do they do?

What do I need to know to code websites?

https://www.youtube.com/watch?time_continue=1&v=gT0Lh1eYk78

Where do websites live?

How does website info get to me?
