

GIS Gaming

Making spatial analysis “fun”

Mark Hoel
Upper Canada College

Teacher in Toronto interested GIS and Minecraft

Gamification: Application of game-play to other areas of activity, to encourage engagement.

Google

This encourages engagement in most grade 10 boys

The story

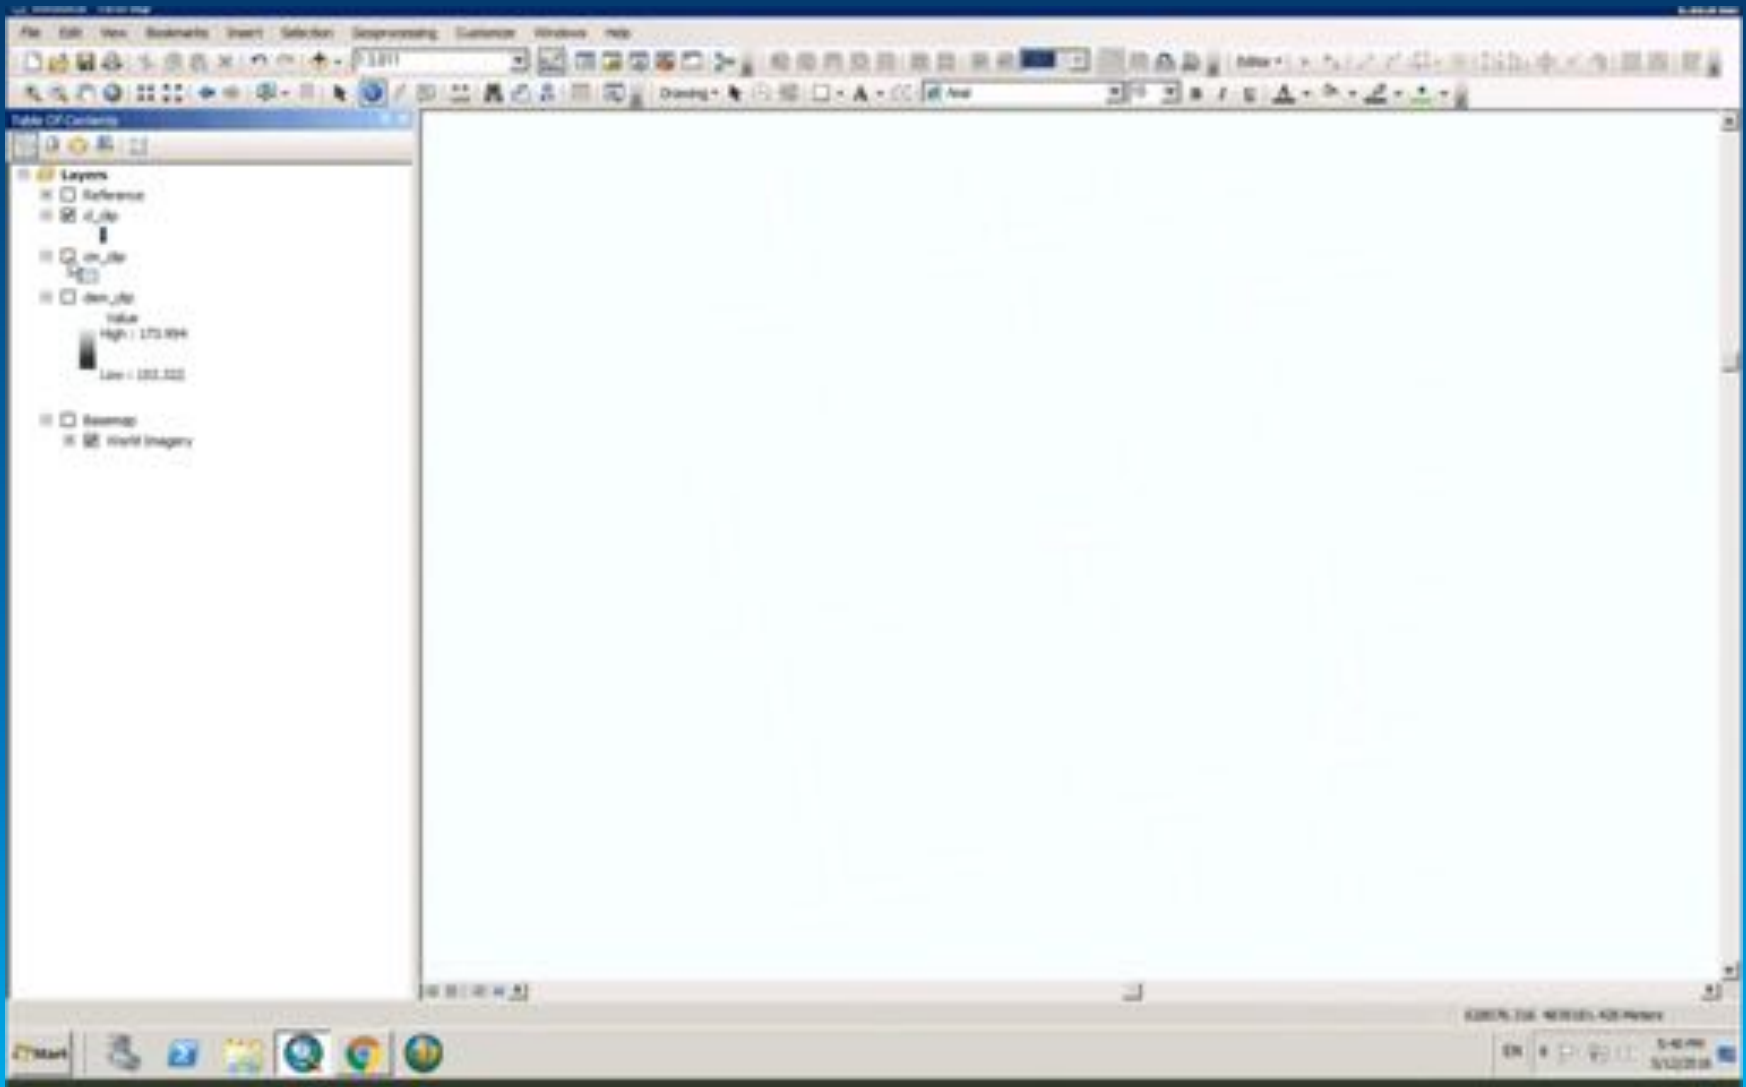

Developing GIS skills and
problem solving with
“Minecraft Spatial”

Site and Situation: Upper Canada College in real life

Stage 1 of fun: UCC in ArcMap

Stage 2 of cool: UCC in ArcScene – 3D!

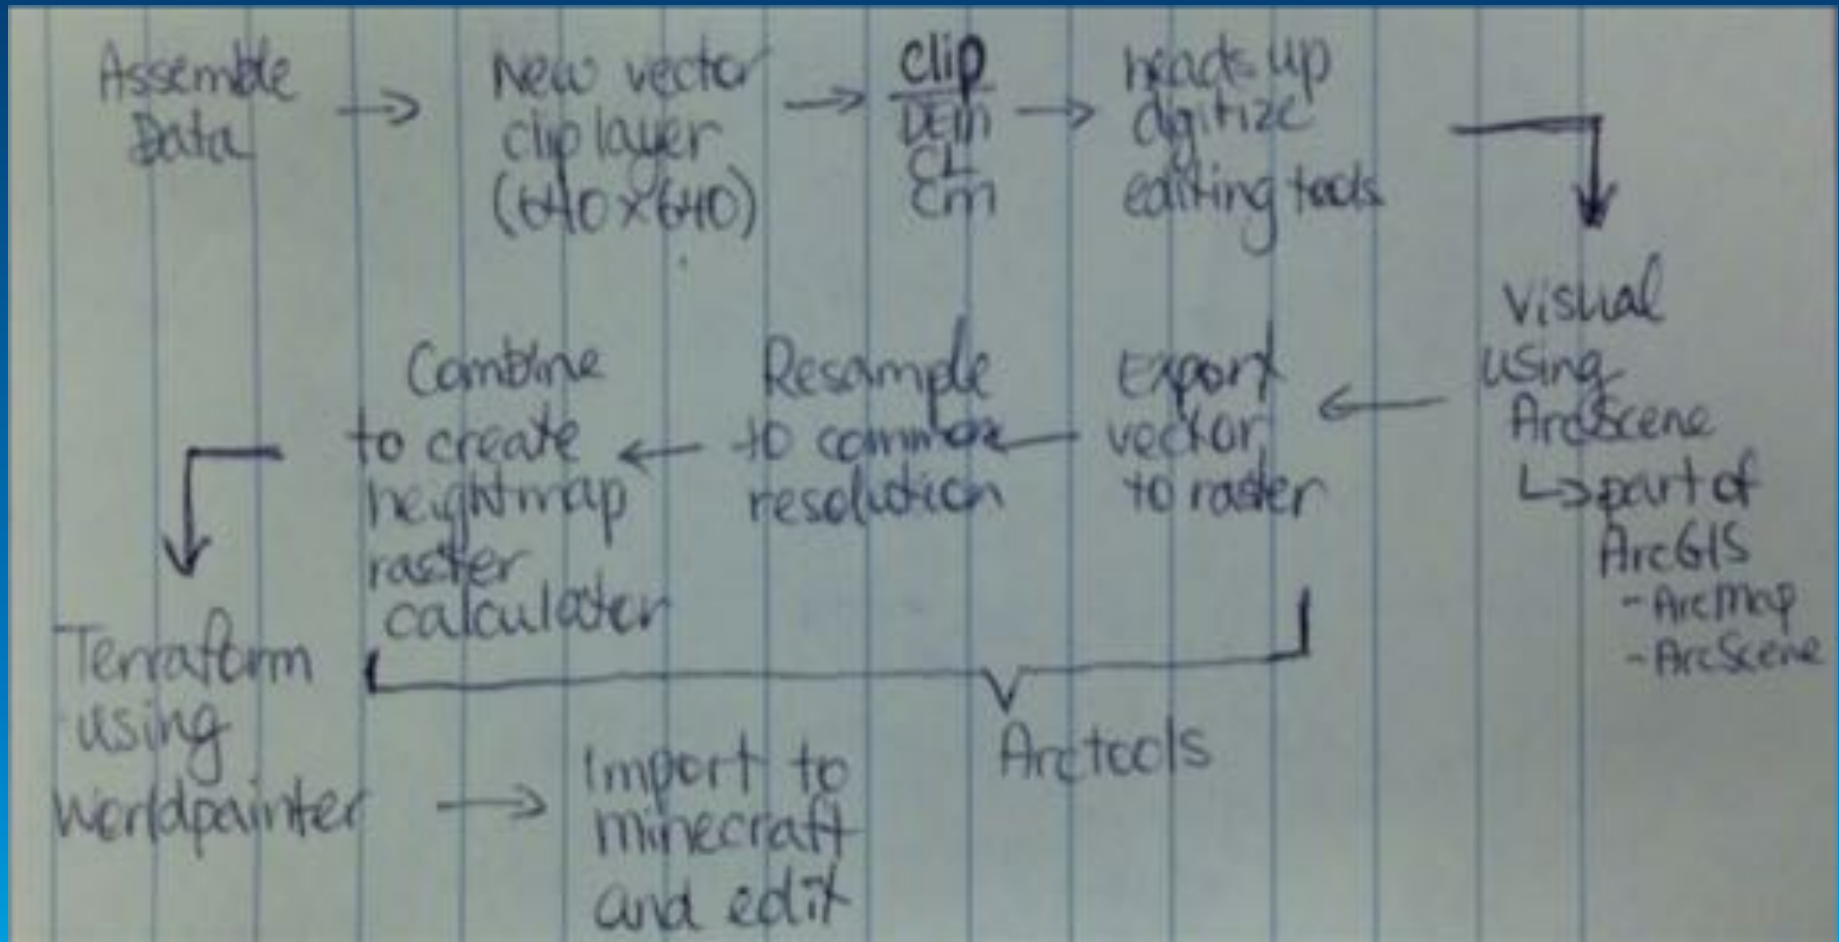

Stage 3: GIS data in Minecraft – THE COOLEST!

The “hook” to keep them engaged through process

A real GIS project == NOT trivial

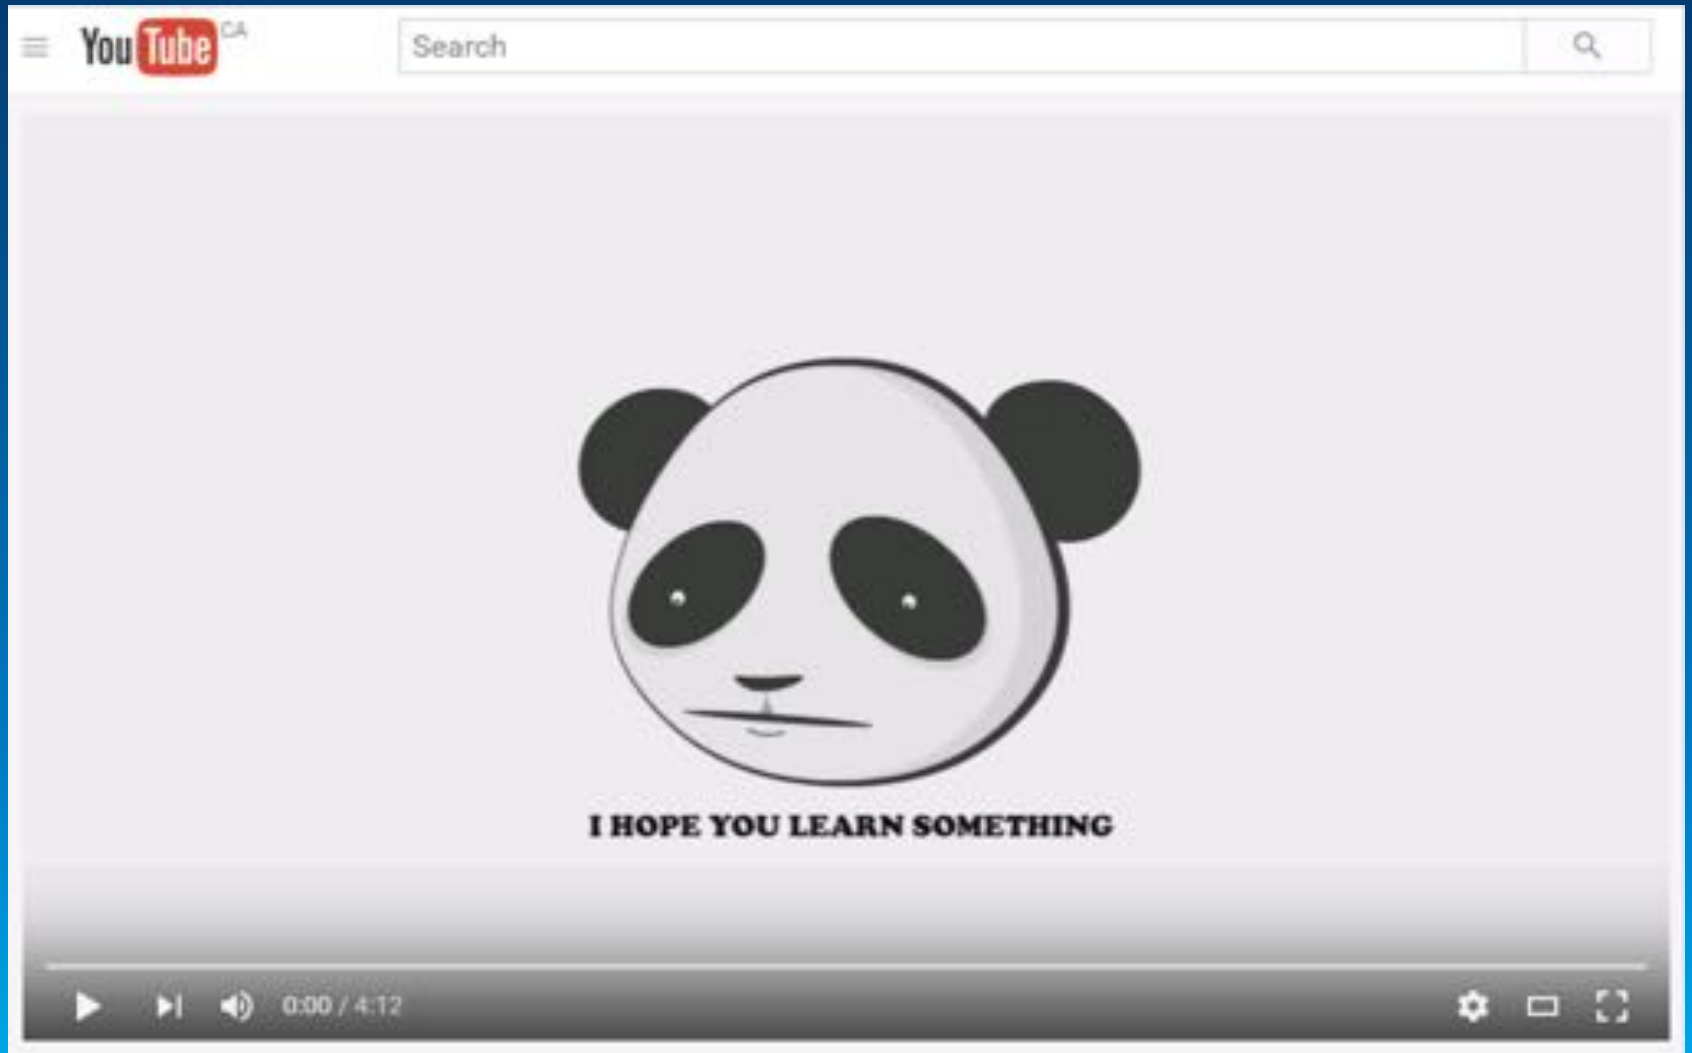

Problem - UCC uses Macs

Teaching style: cookbook lessons with teacher 1 on 1

Units and Lessons Pre-assess Exit Ticket Conversation	
Geography Essentials	
Atmosphere	
December exam	
Lithosphere	
Hydrosphere	
Final exam	

Example tutorial video

Download 3D Buildings, roads and DEM

**Open Data
Toronto**

Clip data to school area – student notes

Clipping Vector and Raster Data to Create New Datasets:

Open ArcMap 10 in Window's Kontiki by connecting to RDC...

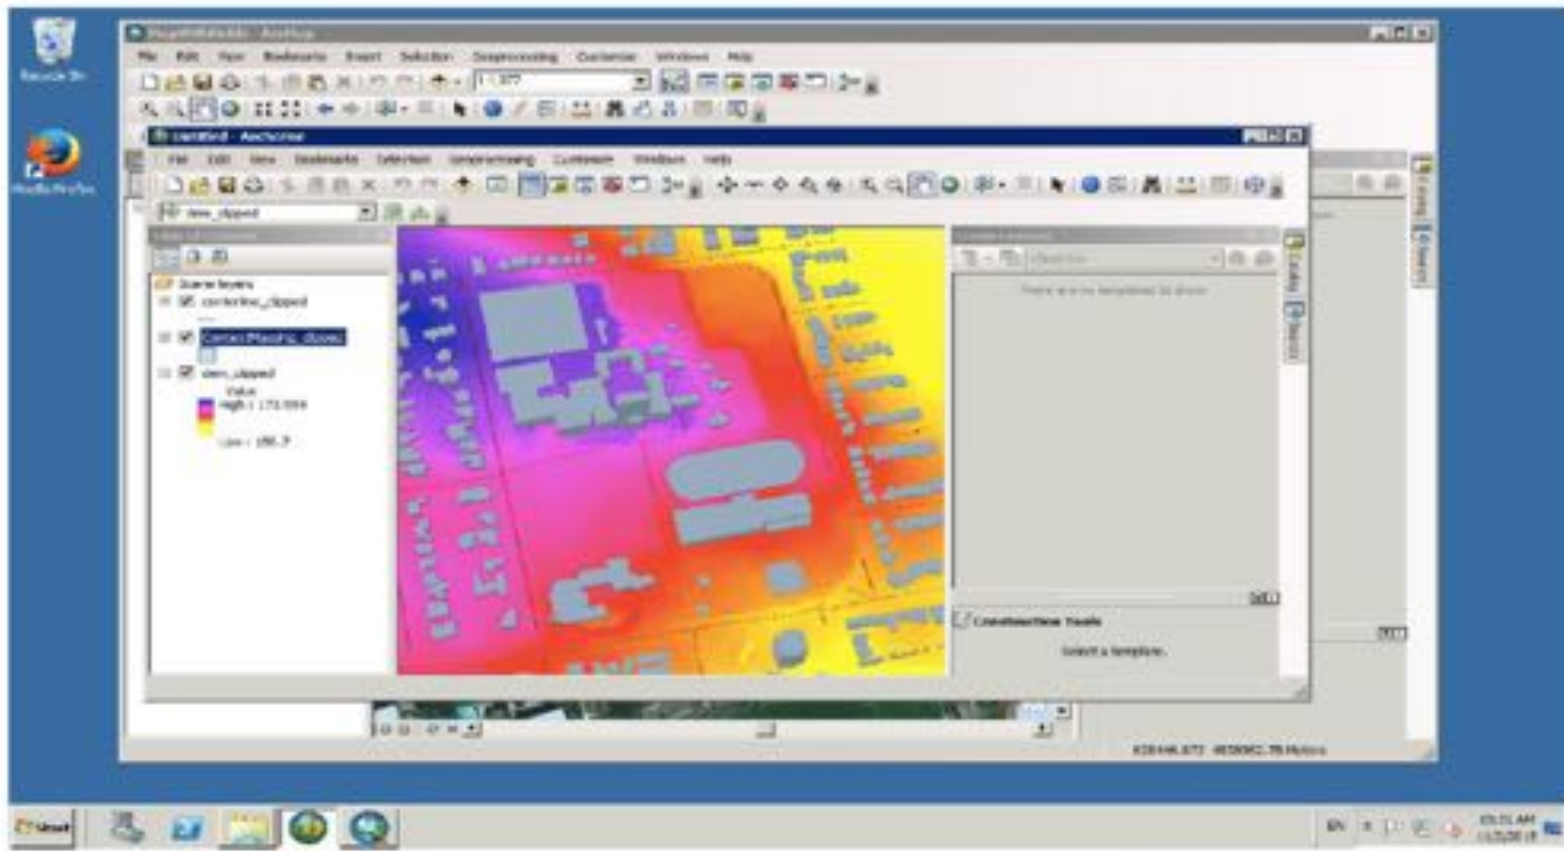

- 1) Open ArcCatalog on the right sidebar.

2D Edits in ArcMap / 3D edits in ArcScene

Vector to Raster Data Conversion and Resampling

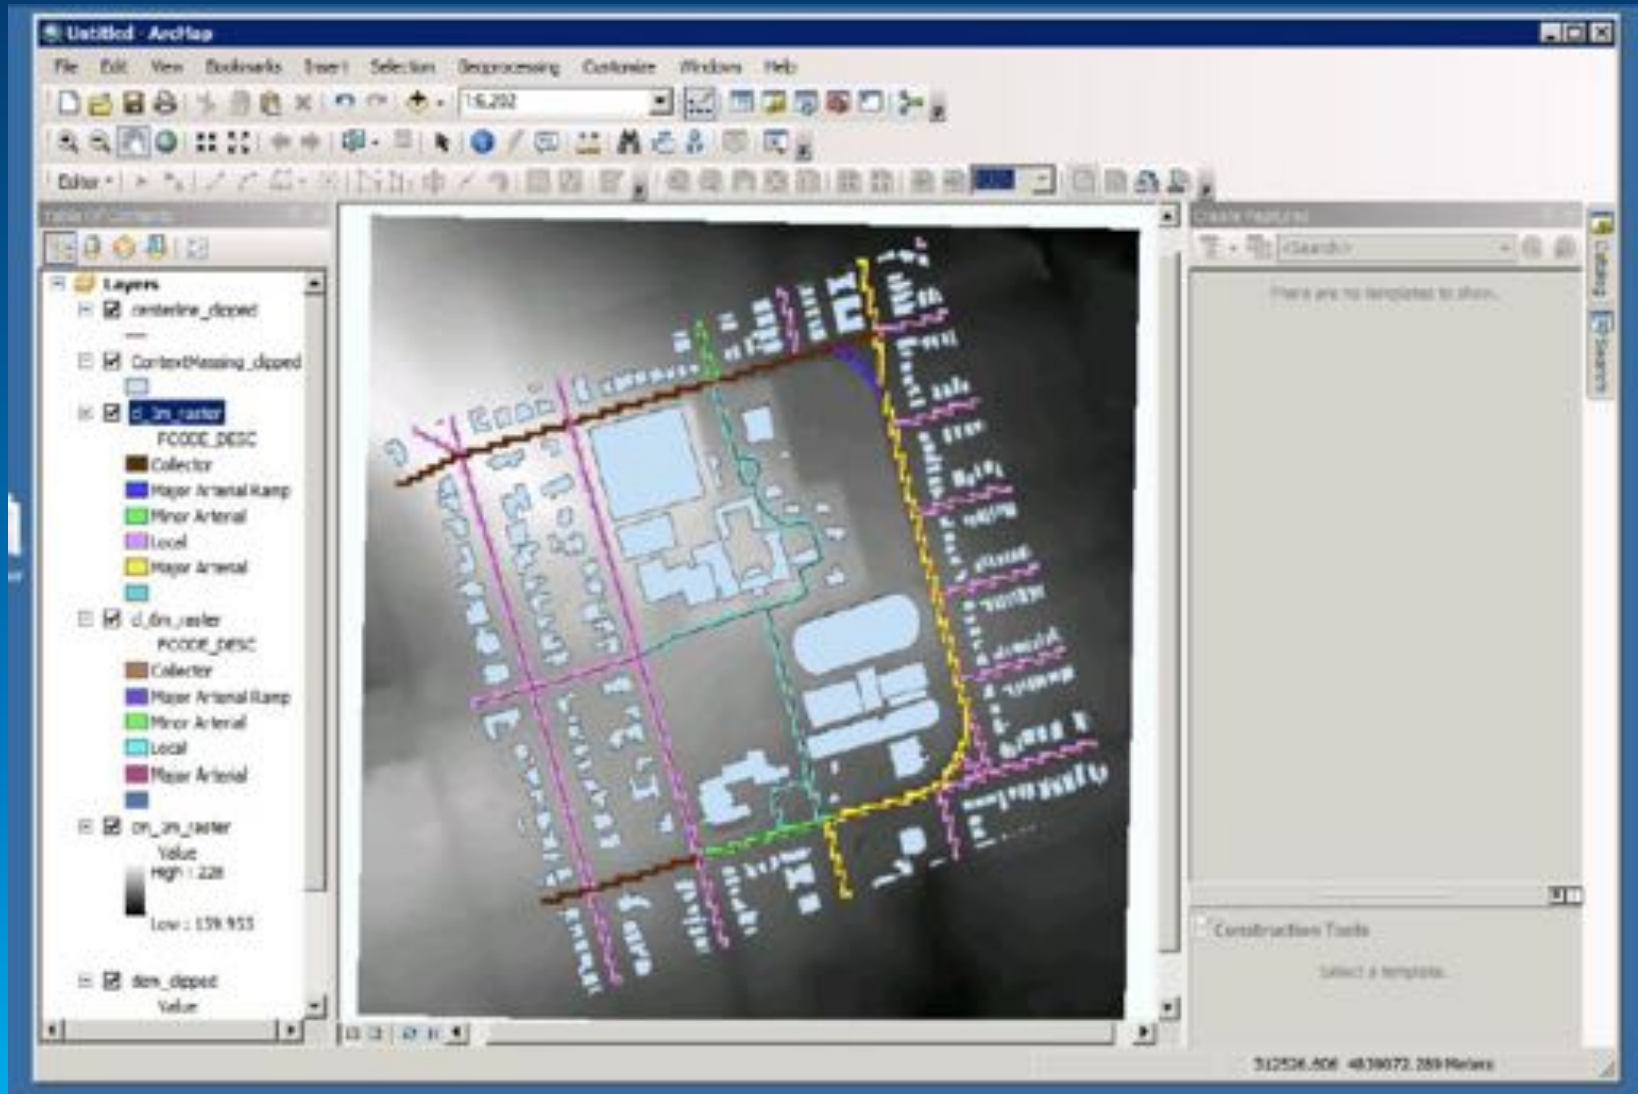

First, I made some changes to my data in ArcScene.

Pumped for 3D editing!

Raster conversion and Resample to Height map

ArcToolBox is full of goodies

Terraform with Worldpainter / export to Minecraft

How did I get Minecraft for free for my students?

Demo time
